

# How To Structure The Content Of Your WordPress Site

---

Shanta R. Nathwani, Sheridan College

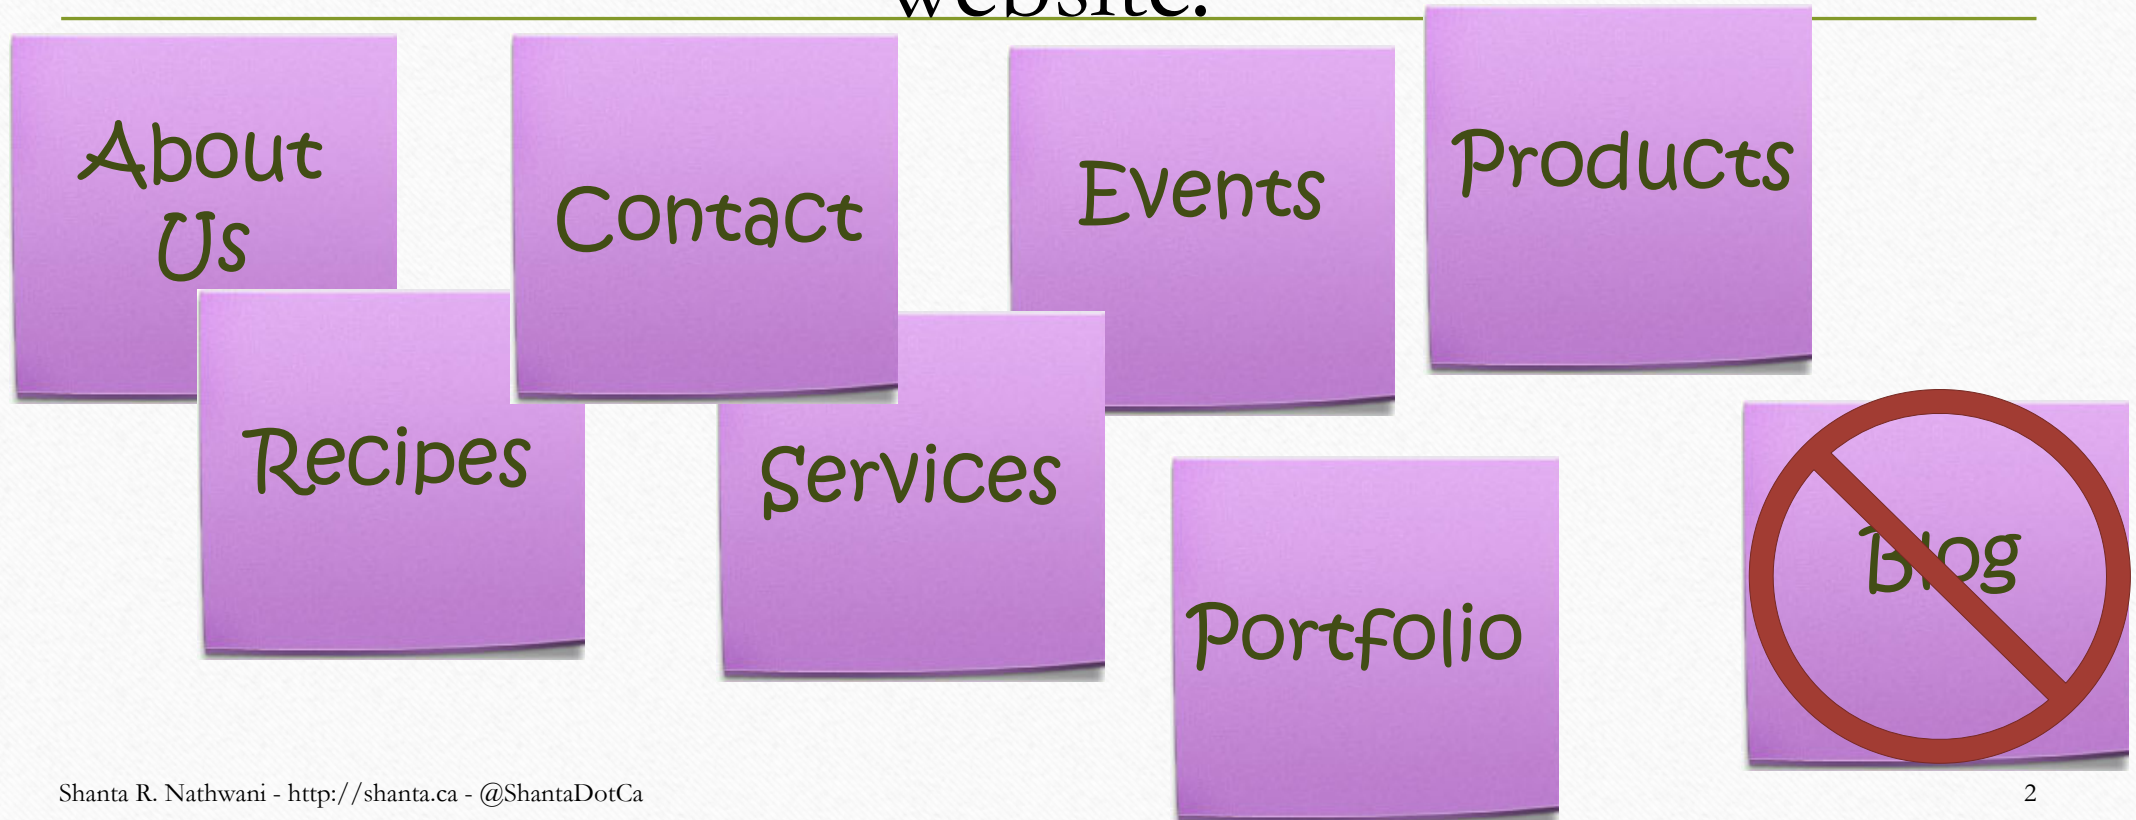

HANDOUTS

Shanta R. Nathwani - <http://shanta.ca> - @ShantaDotCa

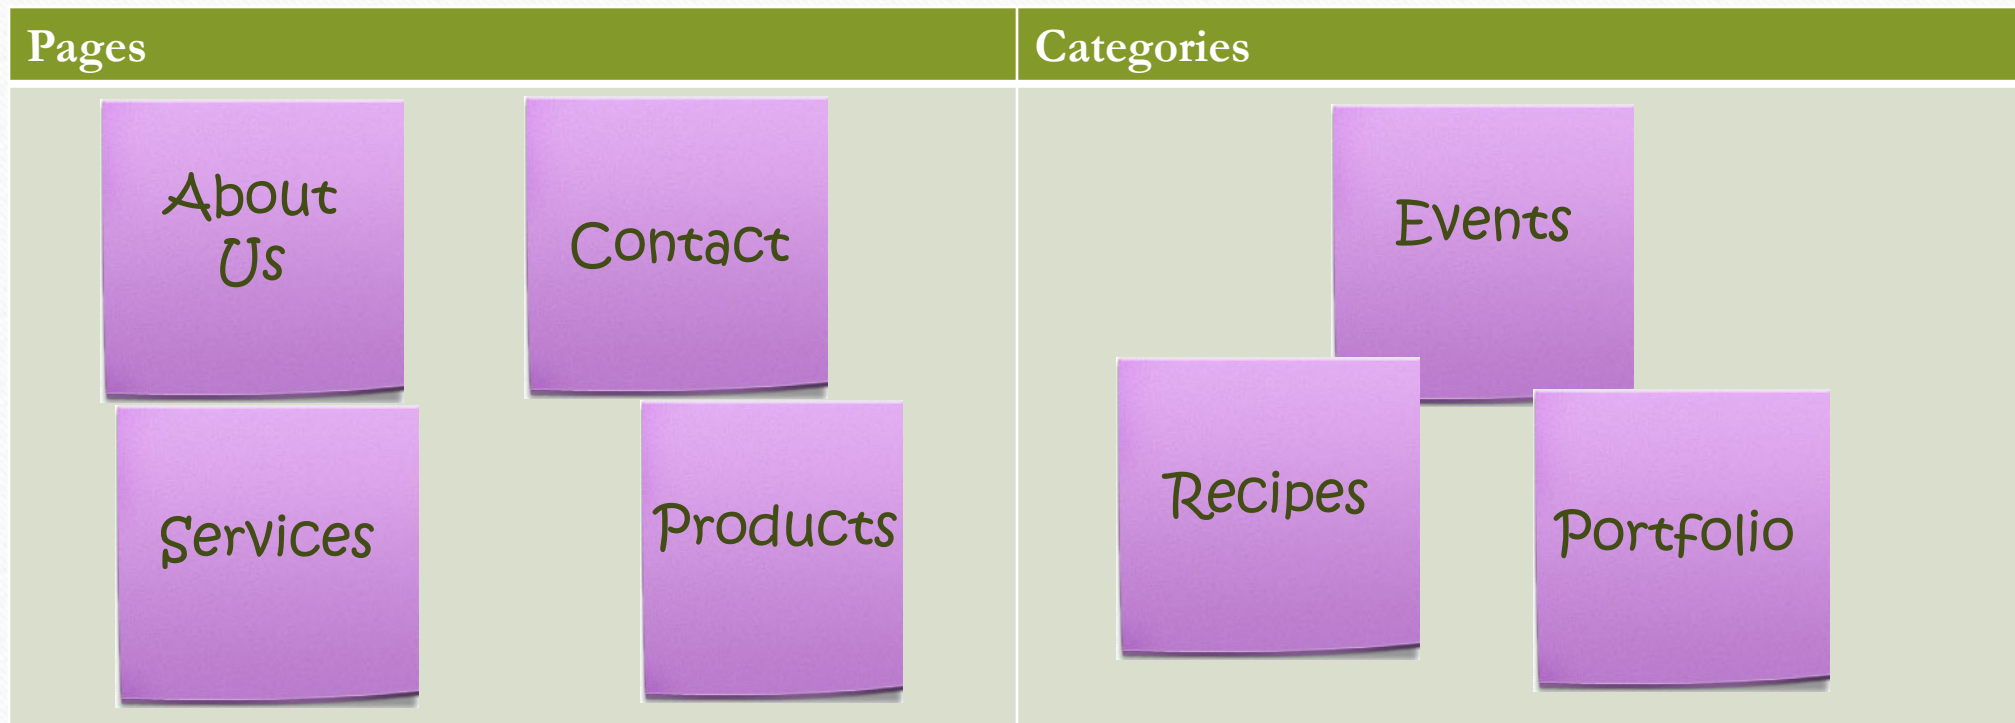

1

WordCamp Miami 2015

1. Write down on post it notes all the main topics that you would like to see on your website.

## 2. Figure out which ones will be Categories and which ones will be Pages

3. Change the colour of either one or the other so that you can tell the difference

4. Keeping the 3-5-7 Rule, start to structure your menus according to the topic, not whether or not your content is a post or a page.

# 5. Create your menu in WordPress using pages and categories!

# Resources

---

- How to create your menu: <https://learn.wordpress.com/get-published-30/#lecustommenu> (Created for .com, but still applicable)
- Information Architecture: Blueprints for the Web: <http://www.amazon.com/Information-Architecture-Blueprints-Christina-Wodtke/dp/0735712506> (until last year, used by our course)
- Don't Make Me Think: <http://www.amazon.com/Dont-Make-Think-Revisited-Usability/dp/0321965515> (one of the books that replaced IA)
- Evil By Design: <http://evilbydesign.info/book/> (the other new book)
- WordPress.tv: <http://shanta.ca/my-wordpress-tv-talk-at-wordcamp-buffalo-2013/> (my earlier talk, including creating the menu)
